Plant and seaweed extracts ..... 4 %

#### DIRECTIONS FOR USE:

The use of FERTILEADER Elite helps to increase sugars. The general time for this activity is 14 to 36 days after application. Do not spray during periods of frost. In hot conditions it is better to spray at the beginning or at the end of the day. Add FERTILEADER Elite in a half clean sprayer and agitate while mixing. Keep agitating until the end of the application. Dilute into at least 20 gallons/Acre. It can also be used in ULV aerial application. Foliar fertilization is intended as a supplement to a regular fertilization program and may not by itself provide all the nutrients normally required by crops or other intended plants.

#### PLEASE READ CAREFULLY BEFORE USING - KEEP OUT OF REACH OF CHILDREN - RECIRCULATE BEFORE USE
