

# BLUE

protect + perform

## ENHANCING FERTILIZER EFFICIENCY

BLUE is an ammoniated, homogeneous granular fertilizer formulated with patented ingredients proven to improve fertilizer efficiency, enhancing crop performance, profitability and sustainability.

BLUE has the ability to promote microbial populations that can help facilitate improved nutrient transport to the roots. It also helps protect phosphorus from retrograde tie-up and increases soil nutrient availability.

### STEP 1

Primary, Micro & Macro Nutrients

### STEP 2

Ammoniated Blending

### STEP 3

Homogeneous Granule

FORMULATION	N	P <sub>2</sub> O <sub>5</sub>	K <sub>2</sub> O	Ca	Mg	S	B	Cl	Co	Cu	Fe	Mn	Mo	Ni	Na	Zn
BLUE 5-17-18	5	17	18		3	8		10		0.50	0.50					1
BLUE 6-6-18	6	6	18	3	4	10	0.05	3			0.50	0.30				0.10
BLUE 8-8-24 SOP Cran Max	8	8	24		0.50	17		2								
BLUE 13-13-13	13	13	13		2	9	0.10	9				0.40				0.20

### TARGET USE:

Pre-Plant Blends

Easy to Use

For All Crops

Available in customizable  
NPK grades.

### BLUE HAS NATURAL CARBON-BASED EXTRACTS PROVEN TO:

- ✓ Reduce phosphorus runoff and tie-up with antagonistic soil nutrients
- ✓ Improve plant nitrogen uptake and reduce nitrate leaching
- ✓ Increase potassium availability in heavy clay soils that can "trap" potassium
- ✓ Improve soil health by feeding beneficial soil micro-organisms
