

TIMAC AGRO TECHNOLOGY

Our patented formulas are derived from nearly 60 years of research and development in plant extract technology. Through precise methods, our extracts are evaluated for their specific effects at each stage of crop development. By enriching selected extracts with macro- and micronutrients, we create bionutritional formulas that meet the ever-changing needs of the crop. Better yield and quality benefit our customers and are the result of improved emergence, vegetative growth, and reproductive performance.

As a company, our mission is to improve agriculture by focusing on four major areas of service to growers:

- Relentless innovation
- Flexible manufacturing
- Optimized applications
- Partners in the field

FEATURES

Maxifruit is a combination of nutrients, highly concentrated seaweed extracts and our patented Maxifruit complex. The formulation is designed to provide the plant with a critical nutritional and physiological boost at fruiting stages.

KEY BENEFITS

- 3-7-7 with Zinc and Manganese to help with fruit setting and sizing
- Foliar nutrition to aid in plant stress when fruit is set heavy
- Formulated with the patented Maxifruit complex

PACKAGING SIZE

- 2x2.64 gallon
- 264 gallon tote

Crop	Application Rate	Timing
Tree Fruit	2 qt/ac (split)	Flowering and fruit set
Vineyards	2 qt/ac (split)	Flowering and fruit set
Vegetables	2 qt/ac (split)	Flowering and fruit set
All Crops	2 qt/ac (split)	Flowering and fruit set

Increased fruit size by
7.6%

Effects of Maxifruit on Gala Apple Size

Maxifruit effects on fruit size at three sampling dates. The 6/26 sampling was 1 day prior to treatment. Letters indicate significant difference. (n=7 farms, 5 subsamples per farm, p-value <0.05%)
