## Effect of 'Dual Tube' In-Furrow Fertiactyl GZ with UAN on Corn

**Crop:**  
Corn

**Researchers:**  
The Farm Research Center, LCC  
Timac Agro USA

**Site Locations:**  
KS/MO Border

### OBJECTIVE

To determine the effects of Fertiactyl GZ with UAN at planting using the 'Totally Tubular' system on yield and ROI in corn compared to Untreated UAN.

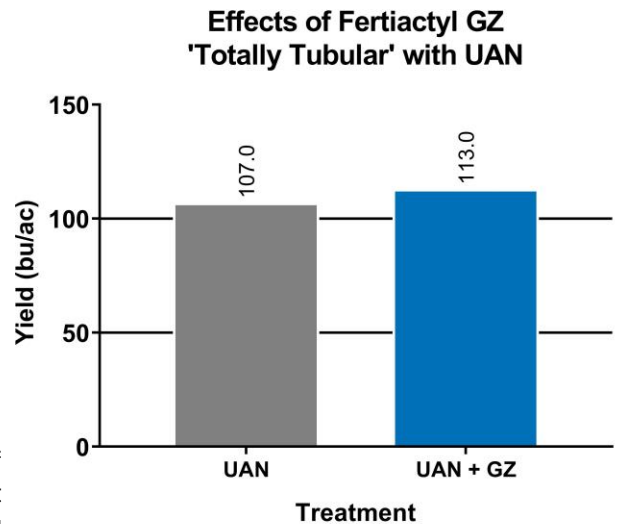

### KEY FINDINGS

**+6 bu/ac**  
with Fertiactyl GZ vs Untreated  
**ROI: + \$7.25/ac**

### STUDY INFORMATION

Planting Date	28-May-2016
Harvest Date	12-Oct-2016
Variety	Unspecified
Population	130,000
Nitrogen Rate	105 lbs ac

**Graph:** Effects of the addition of Fertiactyl GZ with UAN 2x2 at planting

### STUDY DESIGN

All treatments were applied at planting. The nitrogen rate for all treatments was 105 lb N/ac. Corn price used for ROI was \$3.50/bu and Fertiactyl GZ application costs \$13.25/ac

### APPLICATION

Treatment	Application Rate
Untreated UAN	
Fertiactyl GZ + UAN	1 qt/ac
